EDUCATION

Bachelor of Computer Science, National Cheng Kung University

Expected 2027

- **Bronze Medals**, ICPC Asia Taichung Regional (2024, 2025)
- **3rd Place**, 2025 AMD AI Agent Hackathon
- **2-year Teaching Assistant**; mentored 400+ students across programming and algorithm courses.
- Top **2%** of class; consistently earned A+ in Algorithms, Program Design (I & II), and Software Development.

EXPERIENCE

Software Engineer Intern

July 2025 - Aug 2025

Trend Micro

Taipei, Taiwan

- Developed an **AI agent** for automated QA workflows using **LangChain**, LangSmith, and **MCP** tools; integrated it into **CI/CD** (GitHub Actions) in collaboration with **global DevOps teams**.
- Transformed QA from manual scripting to data-driven testing, reducing the testing cycle from **2 weeks to 20 minutes (100x speedup)**.
- Recognized as “**Best Intern**”; authored an internship article featured on Trend Micro’s official website.

Software Engineer & Co-founder

Aug 2025 – Present

Tryzeon

Taipei, Taiwan

- Led full-cycle **Scrum** development of an AI virtual try-on app from zero to one (shipped to App Store & Google Play), integrating a **multimodal LLM** for personalized outfit **recommendations**.
- Architected a scalable system with Clean Architecture, Riverpod, and SWR caching, reducing API calls by 60%.
- Built a **microservices** backend with Supabase and designed an event-driven **ETL pipeline** to pre-aggregate data, enabling O(1) lookup queries.

Infrastructure Engineer & System Administrator

Sep 2023 - Mar 2024

Zero One Technology

Taipei, Taiwan

- Deployed an online judge using **Docker**, load balancing, and Nginx reverse proxy, ensuring high availability for 200+ concurrent users during peak contest periods.
- Authored the first Chinese documentation for an open-source CMS project (**8,000+ views**).

PROJECTS & LEADERSHIP

AI Travel Planner

2025

- Developed a **full-stack** AI travel planning platform with SSE streaming for dynamic itinerary generation.
- Built an AI agent with integrated CRUD operations, using **RAG** to ground responses in retrieved data.
- Implemented real-time collaborative editing using Yjs and WebSocket, enabling conflict-free planning.

Chief Coordinator, SITCON Hour of Code

July - Dec 2023

- **Directed a 30-member team** to host a coding camp for 70+ students, fostering early programming education.

TECHNICAL SKILLS

Languages

C/C++, Python, Java, JS/TS, Dart (Flutter), SQL

AI & Data

LangChain, LangGraph, LLM Agents, RAG, Vector DBs

Backend

RESTful APIs, FastAPI, PostgreSQL, Supabase, MongoDB

DevOps

Git, CI/CD, Docker, Kubernetes, Google Cloud, AWS, Cloudflare
